MUGABO Shafi Danny

Software Engineer

Kigali, Rwanda
(+250) 781-567-627
mugabodannyshafi@gmail.com

SUMMARY

Software Engineer with experience building scalable web applications, APIs, and developer tools. Founder and maintainer of Nestify, an open-source CLI designed to improve developer productivity and streamline project setup within the NestJS ecosystem. Passionate about software architecture, open-source collaboration, and building technology solutions that create real-world impact.

EXPERIENCE

RukaPay, Uganda — *Software Developer*

part-time, Remote
February 2026 -Present

- ➔ *Develop and maintain fintech solutions that enable secure and seamless digital payments.*
- ➔ *Build scalable frontend and backend systems using modern web technologies.*
- ➔ *Design and integrate APIs to support payment processing and merchant services.*
- ➔ *Collaborate with engineering teams to improve platform reliability, performance, and user experience.*

Sanity

Academic Bridge, Rwanda — *Software Developer*

full-time, On-site

August 2024 - March 2026

- ➔ *Developed and maintained digital forms used for student registration, admissions, surveys, and school administration processes.*
- ➔ *Built user-friendly interfaces and backend integrations to streamline data collection from students, parents, and school staff.*
- ➔ *Implemented form validation, data management, and workflow automation to improve efficiency and accuracy.*
- ➔ *Collaborated with the development team to enhance the school's information management system and user experience.*

Website: https://academicbridge.xyz

Andela, Rwanda — *Full-Stack Developer*

full-time, Remote

January 2023 - November 2024

- ➔ *Participated in intensive software engineering training focused on full-stack application development.*
- ➔ *Built scalable web applications and APIs using modern JavaScript and TypeScript technologies.*
- ➔ *Collaborated with developers on real-world projects, applying agile methodologies and industry best practices.*
- ➔ *Strengthened skills in software architecture, testing, debugging, and version control through hands-on project work.*

Website: https://www.andela.com

Open Source

Founder & Maintainer — *Nestify CLI*

September 2025 - Present

- ➔ *Creator and maintainer of Nestify, an open-source CLI for NestJS that helps developers generate and manage production-ready backend applications faster.*
- ➔ *Designed and developed CLI commands, project templates, and automation tools to improve developer productivity.*
- ➔ *Maintains project documentation, manages releases, and drives the project roadmap.*
- ➔ *Promotes open-source collaboration and supports community contributions.*

LANGUAGES

English, Kinyarwanda

EDUCATION

University of Kigali, Rwanda — *Bachelor's degree*

Sep 2024 - present

Bachelor of Computer Science
